

Project Guidelines

The idea of a project is to cement the topics that we learn in class and check out how to apply them in the real world. We expect that you give sufficient time and effort to choose and execute an interesting project out of the list provided or if you want to proceed with some other dataset, elaborately specify the description of it along with the source from where you have procured it.

Project Submission Criteria: For evaluation, you need to submit following items:

1	Jupyter Notebook	Along with the code we expect explanation and observation drawn from the steps you carried out. Follow the same layout structure to ensure that your sheet is professional in nature and thorough enough.
2	PowerPoint Presentation	Create a neat and clean presentation conveying maximum information about your project and how you went around analysing using minimal text.
3	Video	CEO level presentation of up to 10 minutes duration with voice overlaying giving a brief overview of your project. You can use a free version of zoom or OBS or any other software.

Key Points to Remember

- Here are the links for [sample video](#), [sample presentation](#) and [datasets](#) to work on.
- In case you want to use any data set of personal choice, feel free to do so.
- You must name the respective files with <your email ID>. **For example:** [xyz@gmail.com](#)
- Submission of project through email is not allowed except Google Forms.
- Make sure you have a google account associated with you.
- To submit your respective files, please go through this [link](#).

Project Evaluation Criteria: Your project will be evaluated based on following key points:

1	Depth	How broad & deep did you cover & how relevant was it overall
2	Clarity	Were you able to clearly convey the key ideas
3	Flow	Did you find the right way to guide others through your project
4	Video Quality	How clear were you in communicating the idea to the stakeholders
5	Presentation	What was the quality of the PPT in terms of overall content & flow

We really appreciate you putting in the extra effort every day to make it into this field and we stand beside to guide and support you all through.

“Learning is not attained by chance; it must be sought for with ardour and diligence.”
