Seattle Weather Dataset

Content

- Besides coffee, grunge and technology companies, one of the things that Seattle is most famous for is how often it rains.
- This dataset contains complete records of daily rainfall patterns from January 1st, 1948 to December 12, 2017.
- The data is present in a single csv file:
  - seattle_weather.csv - Dataset consisting of approximately 25,551 data samples.

Data Description:

Column	Description
DATE	The date of the observation.
PRCP	The amount of precipitation, in inches.
TMAX	The maximum temperature for that day, in degrees Fahrenheit.
TMIN	The minimum temperature for that day, in degrees Fahrenheit.
RAIN	TRUE if rain was observed on that day, FALSE if it was not. [**target**]

Objective:

- This dataset is intended for binary classification tasks.
- Use this data set to build a model able to predict whether it will rain on a specific day.
